Last Name	First Name	GitHub User Name	Email Address	Roles (preliminary)
	Max	hemnemne		Backend
	Tim	t99-i		Frontend + PO
	Ronny	georgir20		Frontend
	René	Re-Krass		Backend
	Claudia	TuCl		Backend
	Hannes	h4nn3s94		Frontend
	Jasper	jasperjulius		Backend
	Simon	B4rtware		Backend

Goals	Das Ziel ist die Sicherstellung einer effektiven, verlässlichen aber auch gleichzeitig flexiblen Teamkommunikation.
	Jeden im Projekt involviert halten, indem man sich für die aktuellen Aufgaben/Probleme der anderen interessiert.
Meeting norms	Wir treffen uns alle jeden Donnerstag spätestens um 12:35 Uhr.
	Optionales 30-minütiges wöchentliches Meeting kann nach individueller Vereinbarung dazukommen.
	Mehr als 10 Minuten Verspätung müssen kommuniziert werden.
Working norms	Jeder zeigt gegenseitigen Respekt und übernimmt volle Verantwortung für ihre/seine Aufgabenbereiche.
	Features im Team besprechen, Umsetzung in den Kompetenzbereichen / Unterteams.
	Es ist ok manchmal seine eigenene Kompetenzen zu überschätzen und sich rechtzeitg Hilfe zu suchen.
	Bei einer Diskussion von mehr als (ungefähr) 15 Minuten, dann wird abgestimmt. Tie Breaker ist der PO.
Coordination norms	Product Owner sollte Telegram moderieren.
	Meeting Moderation nach Scrum Norm. Darauf achtet der Scrum Master.
	Alternative Modelle werden akzeptiert, solange sie nicht Scrum wiedersprechen.
Communication norms	Für die externe Kommunikation sollte Telegram genutzt werden
	Zoom für weekly calls: (https://tu-berlin.zoom.us/j/68376196208?pwd=b0N6NUFXcnFxQXhaSVB6TXFwM25aQT09)
Consideration norms	Jeder darf einmal ohne besonderen Grund, aber mit vorheriger Ansage, fehlen.
Cont. improvement norms	Wichtige Entscheidungen werden im Meeting Protokoll vom PO abgelegt.
	Jeder darf und soll ehrliches Feedback äußern.
Rewards	Gemeinsames Bier bei Projektabschluss.
	Wir wissen uns gegenseitig für unsere Arbeit wertzuschätzen.
Sanctions	2 Euro Spende an Wohltätige Organisation, wenn man etwas "verhauen" hat.
	Wahlweise Bierspende ans Team.
	xx X x x x X x }{

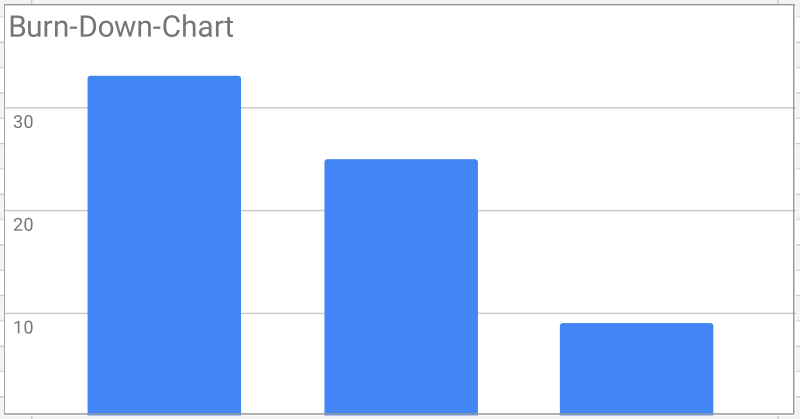
Product Vision	Project Mission
The Explainable Similarity Detector should give all developers who work with electronic components a noticeable offer simplification in everyday work. Through the use of machine learning and an easily understandable surface, the time-consuming search for suitable components should be faster, more convenient and clearer.	The mission of this project is to utilize the machine learning algorithm given by Siemens for the find functionally similar electronic components. This is supposed to be given on the basis of one or more Components are done with the help of filters.
The reason of existence of the envisioned product (beyond this project).	The mission of this particular project (in the context of the product vision).

Term	Definition
user	a developer who works with electronic components
(electronic) components	semiconductors, LEDs, etc.
Industry-Partner-User	Users on the part of the industrial partner who will use the software product
Industry-Partner-Software-Developer	Software developers on the part of the industrial partner who will work on the software product
Scheduled-for-Split	It is likely that this feature will have to be broken down into subtasks
SFS	Shorthand for Scheduled-for-Split
Dummy	A function that has not yet been fully implemented, but is used to test basic functionalities
Project-Developer	Project side software developer

#	Theme	Goal	Feature Name	Est. Size (Feature)	Est. Size (Sprint)	Real Size (Feature)	Real Size (Sprint)	Burn-Down
1-4	Organisation, clearing questions with the Industry-Partner and familiarize with the material				/		/	33
		Allocation of roles, laying the foundations, setting up software and holding first industrial partner meetings (mainly non-code)						
				/		/		
5	Groundwork				11		8	25
		Create first Domain Model to work with (Frontend), testing requests and understanding/working with the ML-Code, data etc.						
			Create first Domain Model with most important entities in mendix	3		3		
			Get-Request (azure-Model) (Dummy)	8		5		
6	Dummy-Prototype (Part 1)				22		16	9
		Deliver first prototype to test basic interaction between frontend and backend and lay the foundation for the Basic-Protoype						
			create JSON-Format	3		5		
			Request function for data(Dummy)	5		0		
			Function for adding component(capacitor)(Dummy)	3		5		
			Create database-scheme(SQL)	3		3		
			Backend-API connection with the database (Dummy)	5		0		
			User feedback function for openAPI	3		3		



#	Theme	Goal	Feature Name	Est. Size (Feature)	Est. Size (Sprint)	Real Size (Feature)	Real Size (Sprint)	Burn-Down

#	Theme	Goal	Feature Name	Est. Size (Feature)	Est. Size (Sprint)	Real Size (Feature)	Real Size (Sprint)	Burn-Down
7	**Dummy-Prototype (Part 2)**				**8**			
		Finish all Dummy function and testing basic interaction for implementation of real functions						
			Backend-API (Dummy)	**5**		**TBD**		
			Function for adding component(resistor)(Dummy)	**TBD**		**TBD**		
			Host-Open-API-Specification (Swagger)	**TBD**		**TBD**		
8	**Basic-Version (Part 1)**				**TBD**		**TBD**	
		Deliver a prototype that can already receive and process input						
			Implementation of the endpoints	**TBD**		**TBD**		
			Machine-Learning model connection	**TBD**		**TBD**		
9	**Basic-Version (Part 2)**				**TBD**		**TBD**	
		Deliver a prototype that implements required functionality						
			Filter results	**TBD**		**TBD**		
			Feedback-Function	**TBD**		**TBD**		
10	**Advanced-Version (Part 1)**				**TBD**		**TBD**	
		deliver a prototype which already contains advanced(non-basic) functionalities						
			Tab system	**TBD**		**TBD**		
			Show data sheet	**TBD**		**TBD**		
			Refresh-Switch	**TBD**		**TBD**		
11	**Advanced-Version (Part 2)**				**TBD**		**TBD**	
		deliver a prototype which already contains advanced(non-basic) functionalities						
			Filter based search	**TBD**		**TBD**		
			Allocation of results in classes	**TBD**		**TBD**		
12	**Advanced-Version (Part 3)**				**TBD**		**TBD**	
		deliver a prototype which already contains advanced(non-basic) functionalities						
			price and property comparison of similar components	**TBD**		**TBD**		
13	**TBD**							
		TBD

				13	Too large (size)		

Sprint	Status	Source	Impediment	Resolution
1	Resolved	Industry partner	Fehlende Informationen zu Spezifikation und Technik	Warten auf User-Journey-Meeting
1	Resolved	Industry partner	Nicht die versprochenen Unterlagen geschickt	Unterlagen bekommen.
1	Resolved	Industry partner	User-Journey Meeting erst in zwei Wochen angesetzt.	Später Termin ist in Ordnung.
5	Resolved	Siemens	Frage bezügliche des Patents/Copyrights für ML-Modell	Mit Riehle gesprochen, ist für den Moment in Ordnung.
5	Resolved	SD	Azure-Experte hat erst "irgendwann" Zeit (sehr spät)	Termin steht für den 30.11
5	Resolved	Prof. Riehle	Privates Git-Repository vs. Benotung	Mit Riehle gesprochen, ist für den Moment in Ordnung.
5	Resolved	Siemens	Copyright Frage bezgl. des Mendix-Templates	Mit Riehle gesprochen, ist für den Moment in Ordnung.
5	In-work	Siemens (Emre)	ML-Modell läuft nicht entgegengesetzt der Ansage	
6	Unsolvable	Maria	Maria ist im Urlaub und nicht erreichbar	Erstmal kein Hinderniss
6	Resolved	Siemens	Ansprechpartner für ML-Modell nicht erreichbar.	Ansprechpartner Emre erreicht und in Kontakt
7	In-work	Siemens (Tejashri)	Noch keine Lizenz für Mendix von Siemens bekommen	
7	In-work	SD	Die Students-Credits für Azure reichen nicht mehr lange	

#	Feature Definition of Done	Sprint Release Definition of Done	Project Release Definition of Done
1	- Code has been reviewed by developer	- no bugs that affect the functionality	- Basic functionality and front end is ready for use
2	- Code has been reviewed by the responsible developer Team (Frontend/Backend)	- small bugs are documented for rectification	- User documentation is ready **(subject to change)**(used and checked by AT LEAST 3 off-project persons (Industry-Partner-User))
3	- individual acceptance criteria are met	- The user documentation is updated according to the changes	- Developer documentation is ready **(subject to change)**(used and checked by AT LEAST 3 off-project persons (Industry-Partner-Software-Developer)
4		- The developer documentation is updated according to the changes	
5		- (Optimal): 80-90% of the assigned tasks were completed successfully	
6		- (Minimum): At least 50% of all assigned tasks have been completed (discussion in the meeting)	
			Appendix: Subject-to-change Expect further information from the industry partner, how many people are available for this
