Goals	Das Ziel ist die Sicherstellung einer effektiven, verlässlichen aber auch gleichzeitig flexiblen Teamkommunikation.
	Jeden im Projekt involviert halten, indem man sich für die aktuellen Aufgaben/Probleme der anderen interessiert.
Meeting norms	Wir treffen uns alle jeden Donnerstag spätestens um 12:35 Uhr.
	Optionales 30-minütiges wöchentliches Meeting kann nach individueller Vereinbarung dazukommen.
	Mehr als 10 Minuten Verspätung müssen kommuniziert werden.
Working norms	Jeder zeigt gegenseitigen Respekt und übernimmt volle Verantwortung für ihre/seine Aufgabenbereiche.
	Features im Team besprechen, Umsetzung in den Kompetenzbereichen / Unterteams.
	Es ist ok manchmal seine eigenen Kompetenzen zu überschätzen und sich rechtzeitig Hilfe zu suchen.
	Bei einer Diskussion von mehr als (ungefähr) 15 Minuten, dann wird abgestimmt. Tie Breaker ist der PO.
Coordination norms	Product Owner sollte Telegram moderieren.
	Meeting Moderation nach Scrum Norm. Darauf achtet der Scrum Master.
	Alternative Modelle werden akzeptiert, solange sie nicht Scrum widersprechen.
Communication norms	Für die externe Kommunikation sollte Telegram genutzt werden
	Zoom für weekly calls: (https://tu-berlin.zoom.us/j/68376196208?pwd=b0N6NUFXcnFhSVB6TXFwM25aQT09)
Consideration norms	Jeder darf einmal ohne besonderen Grund, aber mit vorheriger Ansage, fehlen.
Cont. improvement norms	Wichtige Entscheidungen werden im Meeting Protokoll vom PO abgelegt.
	Jeder darf und soll ehrliches Feedback äußern.
Rewards	Gemeinsames Bier bei Projektabschluss.
	Wir wissen uns gegenseitig für unsere Arbeit wertzuschätzen.
Sanctions	2 Euro Spende an Wohltätige Organisation, wenn man etwas "verhauen" hat.
	Wahlweise Bierspende ans Team.
	xx X x x x X x }

Product Vision	Project Mission
The Explainable Similarity Detector should give all developers who work with electronic components a noticeable offer simplification in everyday work. Through the use of machine learning and an easily understandable surface, the time-consuming search for suitable components should be faster, more convenient and clearer.	The mission of this project is to utilize the machine learning algorithm given by Siemens to find functionally similar electronic components. This is supposed to be given on the basis of one or more Components and with the help of filters. However, functionalities that cannot be completed by the end of the project should be prepared for later implementation (as Mock-Up).
The reason of existence of the envisioned product (beyond this project).	The mission of this particular project (in the context of the product vision).

Term	Definition
(electronic) components	semiconductors, LEDs, etc.
admin	An administrator in the company that uses the product
CD	Shorthand for Continuous Deployment
CI	Shorthand for Continuous Integration
Continuous Deployment	Software releases that successfully pass the automated tests will also be deployed automatically
Continuous Integration	Practice of merging all developers working copies to the same shared main repository
Dummy	A function that has not yet been fully implemented, but is used to test basic functionalities
IaC	Shorthand for Infrastructure as Code
Industry-Partner-Software-Developer	Software developers on the part of the industrial partner who will work on the software product
Infrastructure as Code	Management of the infrastructure in a descriptive model (using versioning like the source code)
Machine learning model	The machine learning model given by the industrial partner
ML-model	Shorthand for machine learning model
Project-Developer	Project side software developer
Scheduled-for-Split	It is likely that this feature will have to be broken down into subtasks
SFS	Shorthand for Scheduled-for-Split
Developer	a developer who works with electronic components (industry partner)
Procurement responsible	An employee responsible for ordering (electronic) components
Mock-Up	A Mock-Up is a feature that is only implemented in the frontend (to show design principles) but has no backend functionality
Quick-Task	Task that was done spontaneously between sprints because there was time left or new tasks or new tasks have arisen during the sprint

#	Theme	Goal	Feature Name	Est. Size (Feature)	Est. Size (Sprint)	Real Size (Feature)	Real Size (Sprint)	Burn-Down
1-4	Organisation, clearing questions with the Industry-Partner and familiarize with the material				/		/	33
		Allocation of roles, laying the foundations, setting up software and holding first industrial partner meetings (mainly non-code)		/		/		
5	Groundwork				11		8	25
		Create first Domain Model to work with (Frontend), testing requests and understanding/working with the ML-Code, data etc.						
			Create first Domain Model with most important entities in mendix	3		3		
			Get-Request (azure-Model) (Dummy)	8		5		
6	Dummy-Prototype (Part 1)				22		16	9
		Deliver first prototype to test basic interaction between frontend and backend and lay the foundation for the Basic-Prototype						
			create JSON-Format	3		5		
			Request function for data(Dummy)	5		0		
			Function for adding component(capacitor)(Dummy)	3		5		
			Create database-scheme(SQL)	3		3		
			Backend-API connection with the database (Dummy)	5		0		
			User feedback function for openAPI	3		3		
Burn-Down-Chart				Development Speed				
								

#	Theme	Goal	Feature Name	Est. Size (Feature)	Est. Size (Sprint)	Real Size (Feature)	Real Size (Sprint)	Burn-Down
7	Dummy-Prototype (Part 2)				34		32	217
		Finish all Dummy function and testing basic interaction for implementation of real functions						
			Backend-API (Dummy)	5		5		
			Function for adding component(resistor)(Dummy)	2		2		
			Host-Open-API-Specification (Swagger)	5		5		
			Backend-API connection with the database (Dummy)/Implementation of azure functions relying on database access (for capacitors)	5		5		
			Create userrole: admin	2		2		
			Request function for data (Dummy)	5		8		
			Implementation fo azure function for ML-model inference (Dummy)	5		0		
			Host Mendix Docker container on azure	5		5		
8	Basic-Version (Part 1)				22		23	194
		Deliver a prototype that can already receive and process input						
			Implementation of azure functions for ML-model inference(Dummy)	5		8		
			(restructuring / adapting) of data and mapping	5		5		
			Split endpoint for retraining and adding of new components	5		5		
			Create new users	3		0		
			Backend-API connection with the database (Dummy)/Implementation of azure functions relying on database access (for resistors)	2		2		
			Fix the 500 Server Error on the Backend-API comnection when accessing endpoints	2		3		
9	Basic-Version (Part 2)				40		37	157
		Deliver a prototype that implements required functionality						
			Post request for single capacitors	5		5		
			Generalising Backend-API connection with the database (Dummy) for attributes	3		2		
			Parse POST Body-Content in ML API	5		3		
			Use hash function for returning Mock ML comments in API	2		2		
			Add suffix 'schema' to pydantic models	1		1		
			Improve error handling in CreateSimilarities endpoint	3		0		
			Create new users	3		3		
			Add CI pipeline	5		3		
			Change Framework	5		5		
			Add tests for Azure Functions	8		13		
10	Basic-Version (Part 3)				31		26	131
		Deliver a prototype that implements required functionality						

#	Theme	Goal	Feature Name	Est. Size (Feature)	Est. Size (Sprint)	Real Size (Feature)	Real Size (Sprint)	Burn-Down
			Deserialize Return Message from ML-model Inference	3		3		
			Get request for a list of similar components	3		3		
			Subsequent editing of entries in the list	3		3		
			Refractoring API Request (Get-Request)	3		2		
			Functionality to show a list of components with names similar to the given component type	0		3		
			PDF-Button	0		1		
			Improve error handling in GetSimilarities endpoint	3		2		
			Improve error-Handling via Pydantic	5		0		
			Integrate ML Model into Azure Function and De-Deploy it	3		3		
			Additional CSS-Design	3		3		
			Unit-Test(Fix CI-Pipeline)	5		3		
11	Advanced-Version (Part 1)				27		46	85
		deliver a prototype which already contains advanced(non-basic) functionalities						
			Add CD pipeline	5		8		
			Include MIN MAX value for each attribute through an endpoint	5		5		
			Add order functionality for ReadSimilarities endpoint	0		5		
			PDF-Button connection (Endpoint)	3		3		
			Filter-Frontend-Button (nur Mock-Up keine Funktionshinterlegung)	0		3		
			Show information for individual search results	0		3		
			Correct Words in Frontend	1		1		
			List of differences (Difference_In)	3		5		
			Add CD pipeline(frontend)	5		8		
			Improve error-Handling via Pydantic	5		5		
12	Advanced-Version (Part 2)				33		50	35
		deliver a prototype which already contains advanced(non-basic) functionalities						
			Sorting best result	1		2		
			Add similarity grade in admin page (Mock-Up)	2		2		
			Redesign(Misc)	2		5		
			New Widgets	5		5		
			Filter-Redesign	3		5		
			Post Request for adding a new component	5		5		
			Login-Page redesign	5		5		
			Use IaC concept (e.g. Terraform) to easily deploy resources on Azure	5		5		
			Add CD pipeline(backend)	5		8		
			Switch storage from internal Database	0		5		
			Fix design of "added components"-page	0		3		
13	Advanced-Version (Part 3)				30		39	0

Sprint	Status	Source	Impediment	Resolution
1	Resolved	Industry partner	Fehlende Informationen zu Spezifikation und Technik	Warten auf User-Journey-Meeting
1	Resolved	Industry partner	Nicht die versprochenen Unterlagen geschickt	Unterlagen bekommen.
1	Resolved	Industry partner	User-Journey Meeting erst in zwei Wochen angesetzt.	Später Termin ist in Ordnung.
5	Resolved	Siemens	Frage bezüglich des Patents/Copyrights für ML-Modell	Mit Riehle gesprochen, ist für den Moment in Ordnung.
5	Resolved	SD	Azure-Experte hat erst "irgendwann" Zeit (sehr spät)	Termin steht für den 30.11
5	Resolved	Prof. Riehle	Privates Git-Repository vs. Benotung	Mit Riehle gesprochen, ist für den Moment in Ordnung.
5	Resolved	Siemens	Copyright Frage bezgl. des Mendix-Templates	Mit Riehle gesprochen, ist für den Moment in Ordnung.
5	Unsolvable	Siemens (Emre)	ML-Modell läuft nicht entgegengesetzt der Ansage	
6	Unsolvable	Maria	Maria ist im Urlaub und nicht erreichbar	Erstmal kein Hinderniss
6	Resolved	Siemens	Ansprechpartner für ML-Modell nicht erreichbar.	Ansprechpartner Emre erreicht und in Kontakt
7	Resolved	Siemens (Tejashri)	Noch keine Lizenz für Mendix von Siemens bekommen	
7	Resolved	SD	Die Students-Credits für Azure reichen nicht mehr lange	Falls Credits drohen leer zu gehen, einfach bei Dirk melden
